

**\*Note that their policy covers both Service Ceilings Limited t/a SCL Interiors & SCL Interiors (London) Limited\***

Service Ceilings Limited t/a SCL Interiors is committed to the responsible procurement of forest products. Our long-term intention is to source all forest products we procure directly or indirectly (through sub-contractors) from well-managed forests which have been verified to credible certification standards. Globally, many state governments are taking steps to improve forest governance and eliminate illegal logging. These include new regulatory requirements in places we work.

Therefore, it is important to Service Ceilings Limited t/a SCL Interiors that we abide by all applicable local, state and national laws and international conventions. In addition:

Service Ceilings Limited t/a SCL Interiors will never knowingly become involved in, collude with or procure timber from illegal logging operations;

We will work with our supply chain to ensure that where possible all forest products originate from FSC-certified sources;

Service Ceilings Limited t/a SCL Interiors Timber Procurement Policy requires that all timber and wood-derived products must have Forest Stewardship Council (FSC) Chain of Custody certification, or in cases where it is not possible to source FSC-certified products, we will source from independently verifiable legal and sustainable sources; and

Service Ceilings Limited t/a SCL Interiors believes that the FSC currently represents the gold standard and a credible benchmark for responsible forest management, and it remains our preference to increasingly source from credibly certified forests or verified recycled sources. Timber which only meets legal and sustainable sources criteria, or is from other certified sources with a complete chain of custody, will be accepted only in very special cases, see exemptions to the policy below.

#### **Subcontractor sourced timber**

When requested, suppliers must be able to provide evidence to Service Ceilings Limited t/a SCL Interiors that the wood or wood products they supply are from legal and sustainable sources. Note that for a source to be considered sustainable the legality criteria also have to be met. In order to assist procurement personnel and suppliers, Service Ceilings Limited t/a SCL Interiors has identified two types of evidence that will demonstrate the legality and sustainability of timber and timber products.

**Type 1** evidence is independent certification of the timber and timber products by any of the forest certification schemes that meet the policy requirements and evidence these have been procured with a complete chain of custody for Service Ceilings Limited t/a SCL Interiors use.

FSC is by far the most robust and Service Ceilings Limited t/a SCL Interiors preferred scheme. Others that may be considered are: Sustainable Forestry Initiative SFI, Canadian Standards Association scheme CSA and PEFC. (PEFC is an “umbrella scheme” which endorses national schemes. The Canadian scheme, CSA, and the North American, SFI, have been endorsed by PEFC.)

Please Note.

For certain product groups and countries of origin (for example China, Central African countries, Indonesia, Russia, Brazil and Malaysia) we will only accept FSC-certified products.

**Type 2** evidence is alternative documentary evidence that provides assurance that the source is legal and sustainable. For example, evidence of legal authority to harvest from the country of origin, evidence of payment of royalties or other fees via official records of payment, and so forth.

•  
These two forms of evidence can be combined, for example when the forest of origin is certified, but the chain of custody is not.

#### Exemptions to the policy

Only in situations where a particular type of product or timber species is needed and it is not possible to source FSC products will exceptions to the requirements be accepted. Service Ceilings Limited t/a SCL Interiors will always take reasonable steps to ensure that the source is legal and sustainable and preference will be given to material from sources that are demonstrably in an active program to improve and certify forest management.

Exemptions will only be permitted where authorised by the buyer and Managing Director. They must be provided with:

1. A documented justification setting out why FSC products can't be used;
2. Evidence that the source of material was legally managed; and
3. Confirmation that the client is aware.

#### Policy review:

This policy has immediate effect and replaces all previous versions. This policy will be reviewed on an annual basis unless circumstances change.
